D5.15 V.1 TOOLBOX HANDBOOK

PRACTICE WP5 deliverable

Dissemination level: RE

Nature: Report

UNCLASS

1. Executive Summary

This document describes the Handbook of the V1 version of the Toolbox before test and evaluation during the exercises. It is the “sister” deliverable to the D5.14 that describes the Toolbox V1 before the exercises.

As the implementation of the Toolbox is **an iterative process**, this V1 version will be updated over time.

Although the Toolbox itself encompasses both the FRAMEWORK and the CONTENT, this document describes mainly how to use the Toolbox without describing in detail the content, which is the object of the D5.14 document.
