## D7.5 WEBSITE FOR “PUBLIC TRAINING”

*PRACTICE WP7 deliverable*

*Dissemination level: PU*

*Nature: Prototype*

**UNCLASS**

## 1. Executive Summary

This document describes the Website for "Public Training". This Website has been produced on the basis of the Toolbox V1. It is focussing on the key elements that would help the "General Public" to train and get valuable information during a CBRN Crisis.

This initial implementation will be improved and expanded after the exercises.

This "Public" Website is an integrated part of the Toolbox being developed.

It will be further developed through the inputs and the feedbacks of specific Trainees that will feed this Website with Training material / knowledge and test and provide feedback for the next iteration of the development.

After the exercises in UMEA Sweden, Pionki Poland, and Sandö Sweden, the iterative feedback will provide recommendations for further improvements.
